“We have built a strong relationship over the years, it’s a good service that we rely upon regularly”

Details accurate at time of print, 2014.
Staffordshire Scientific Services are able to offer a comprehensive series of UKAS accredited allergen testing. If allergens are present in a food product then the Food Labelling Regulations specify that the products must be labelled with the correct allergen information. Testing and expert advice is available in the following areas:

- Composition and labelling
- Food products
- Raw materials
- Swabs
- Rinse waters

A sampling and courier service may be available on request.

**Providing reliable testing to current Legislation, British Standards and Codes of Practice.**

*UKAS Accredited*
